

# SPAN

## Introducing a smarter electrical panel

Shift your home to clean energy with Span, a smart replacement for the electrical panel. Designed to pair with solar, storage, and electric vehicles, Span lets you intuitively control all your home energy.

### Embedded intelligence

Span will balance your energy needs and make it easy to optimize your power.

### Real-time & remote

Span brings you intuitive ways to control your home energy from anywhere.

### Customizable backup

Paired with battery storage, Span lets you stay adaptable during power outages.

## Get Span

Span is available through select partners and contractors. Interested in moving your home forward with Span?

## Smart and seamless

Span replaces the electrical panel to become the center for connected power in your home.

Span provides all the safety features of a standard panel with added functionality and flexibility designed for the modern home.

## Intuitive controls

Span goes beyond monitoring with an app for scheduling, real-time controls, and useful alerts to make energy management easy.

Combined with battery storage, Span gives you the power to choose and change backup priorities whenever you want.
