

SPAN[®]

The smarter panel upgrade

\$ Save with home energy insights

Monitor & control every circuit

Prepare your home for future electrical upgrades

A home's electrical panel will need to be replaced or upgraded for a variety of reasons, including when installing new appliances, adding electric vehicle charging, meeting current electrical codes, or improving safety.

If you're planning on making any major home energy upgrades—such as **installing an EV charger, heat pump HVAC system, water heater, solar panels or battery backup**—now is the time to prepare your home by replacing your electrical panel with a SPAN smart panel.

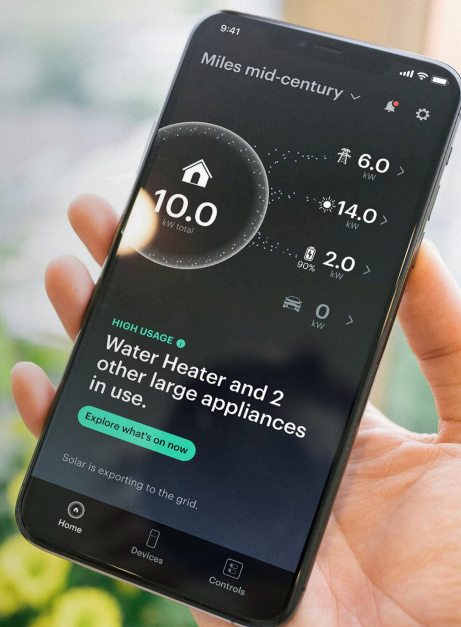

Do more with data

SPAN helps homeowners manage their energy costs, circuit by circuit from the SPAN Home App. Use SPAN's intelligent insights to maximize energy efficiency and lower energy bills for the long term.

The SPAN Advantage

Adding a SPAN smart panel to your home can help you **save money on your energy bills and be fully prepared for future home upgrades**—all at a reduced lifetime cost of ownership, and a similar installation cost to that of a traditional electrical panel.

Upgrading your electrical panel is a once-in-a-lifetime decision. Don't settle for outdated technology; choose SPAN, the most innovative home energy management solution available today.

Traditional panel

No savings opportunities

Basic circuit breaker functionality that doesn't enable reduced consumption for energy savings.

Future upgrade costs & disruptions

Additional (often high) installation costs required when adding new electrical loads to your home.

Manual breaker control

Circuit breakers can only be managed at the panel.

Zero visibility

No energy insights or actionable home data; no smartphone or tablet app dashboard.

No monitoring capabilities

No consumption data on appliance performance.

SPAN Panel

Save on energy bills

SPAN helps homeowners manage their energy costs, circuit by circuit from the SPAN Home app. Use SPAN's intelligent insights to maximize energy efficiency and lower energy bills for the long term.

Add value to your home

SPAN unlocks future home upgrades like heat pumps, water heaters, EV charging, solar and battery backup with a single cost for installation, helping homeowners avoid expensive utility service upgrades.

Control circuits from anywhere

Real-time on/off control over every circuit in the home from the SPAN Home App.

Learn from deep energy insights

SPAN centralizes energy data into one real-time dashboard, giving homeowners a 360° view of their home's energy use.

Gain peace of mind

Leverage SPAN consumption data to monitor appliance performance and take action when needed.
